

Product durable up to a year as a standalone sealant

# GRAPHENE COATING

A quick and easy coating that leaves your car in showroom condition in a matter of minutes.

### Safe for use on:

- Paint
- Glass
- Chrome
- Wheels
- Plastic
- Trim

*Safely clean, shine, and protect with just a quick mist and wipe.*

### Can be used as:

- Topcoat sealer protectant
- Self cleaning properties
- Drying aid

## Real Life Results.

Crystal Fusion™ Graphene Spray Coating provides incredible gloss and durability against damaging environmental contaminants. **This is the perfect standalone Graphene Coating.**

A quick, waterless coating for all exterior vehicle surfaces. Graphene's unique nano-molecular structure and chemical nature allow for increased slickness, gloss, colour-rich reflection, and durability. For optimum purity and performance, no fragrance oils or dyes have been added. Extreme resistance to strong detergents.

## Protects paint from:

- ✓ Water Spotting
- ✓ UV Rays
- ✓ Chemical Stains
- ✓ Contaminants

The solution to a more™  
beautiful vehicle.

## Why Crystal Fusion™ Graphene Coating?

Crystal Fusion™ Graphene Coating has been formulated to provide protection on its own, or enhance existing protection. An extreme gloss, superhydrophobic formula that chemically bonds with your car's paint and creates a new layer of protection.

## Advantages of Crystal Fusion™ GRAPHENE COATING

*Our Graphene variant offers improved characteristics:*

- ✓ Depth and clarity to your car's surfaces
- ✓ Stain resistance
- ✓ Scratch resistance
- ✓ Longer-lasting coating
- ✓ 10-15° Water evacuating angles
- ✓ 110-118° Higher contact angles
- ✓ >9H Hardness
- ✓ Ultra-Hydrophobic
- ✓ High Slickness
- ✓ Wet, glossy look

## Shield protection designed to shine.

### Enhance your shine.

**Streak-free, incredible gloss, & safe for any surface.** Outshine the competition with state-of-the-art technology, high gloss, and deep shine. Extend the life of your car wax, paint sealants, and ceramic coating. Safe to use on all surfaces.

**A great addition to your car cleaning kit.** Crystal Fusion™ Graphene Coating can be sprayed over your existing ceramic coating, adding to the shine and hydrophobic properties of your ceramic coatings and waxes.

### What is Crystal Fusion™ Graphene Coating?

Graphene is a game-changing, carbon-based molecule that effectively binds to and fortifies surfaces when functionalized through a graphene dispersion.

Due to its molecular structure, it demonstrates an improved contact angle, gloss, scratch resistance, UV resistance, and a reduction in water spotting.

A semi-permanent shield.
